## Overview

(120 Words or less)

The Corsair Dominator® Platinum builds on the legacy of the world's most awarded high-performance memory, adding a striking new industrial design and LED lighting effects. Like all Dominator memory modules, they are built using only select memory ICs, highly-screened for performance and stability, and feature our patented DHX® (Dual-path Heat eXchange) cooling technology, so you can push them to the limit.

The new design will look great in your current system—or your next build—and the user-swappable light bar lets you customize the LED lighting to match your rig. You even can connect Dominator Platinum to the Corsair Link system to monitor temperature and activity. It's memory with both muscle and finesse.

## Features

| Feature | Benefit |
|---|---|
| • Hand Screened Performance IC's | Using best of the best IC's available leads to highly overclockable memory |
| • DHX cooling | Patented technology pulls performance-robbing heat away from the modules and allows Dominator memory to run at a cooler temperature. |
| • Customizable light bar | Customize the look and feel of your memory with upgradable light bars and light pipes. Coming September 2012. |
| • Corsair Link compatibility | The Corsair Link Digital connector allows you to monitor your memory's temperature for an optimal combination of performance and stability. |
